vol 3 no 1 january 1984

- 3 **Special-purpose hardware and effective information processing**  
**Maristella Agosti** looks to the future for information processing systems architecture
- 15 **Relevance feedback and a fuzzy set of search terms in an information retrieval system**  
A retrieval strategy that allows modification of the original query is described by **A F Smeaton**
- 25 **Direct file organization for lemmatized text retrieval**  
**K Devine and F J Smith** describe a system based on hash ordering and recording of semantic relationships
- 33 **Soft evaluation of Boolean search queries in information retrieval systems**  
**C D Paice** examines the rationale for soft matching through two examples
- 43 **Augmented semantic networks for an enterprise knowledge base**  
**Paltin Sturdza** describes the application of a knowledge base model to systems analysis and database design
- 54 **Conference report**  
NATO Advanced Study Institute — Information Technology and the Computer Network **K G Beauchamp**
- Book reviews**
- 58 **W S Cooper: Foundations of logico-linguistics: a unified theory of information, language and logic**  
*P Thompson*
- 60 **P Cheng-Chao Wang (Ed.): Automation technology for management and productivity — advancements through CAD/CAM and engineering data handling**  
*B C Reardon*
- 61 **V J Calderbank: A course in programming in FORTRAN revised to incorporate FORTRAN 77**  
*J Morris*
- 61 **W J Welch and P A Wilson: Facsimile equipment**  
*M Sherwood-Smith*
- 62 **M James: Viewdata and the information society**  
*J H Ashford*
- 62 **S J Newton: Text filing and retrieval systems — a practical evaluation guide**  
*A F Smeaton*
- 63 **G W A Dummer: Electronic inventions and discoveries**  
*G L Reed*

The publishers are pleased to announce that, from this issue, *Information Technology* will be published in a new expanded format. This change reflects our intention to provide the most complete source of information available to those working in information technology.

Since its launch, *Information Technology* has become firmly established as a leading journal in the field of information storage and retrieval. It is now taking on new responsibilities. While the journal will continue to provide the highest quality research papers, of the same standard that our readers have always expected and received, it will now offer an even more comprehensive information package, taking in the 'sharp end' of information technology at the application level.

Another new service will be the provision of updates on the activities of relevant organizations and special-interest groups. The journal will also carry detailed conference reports and a full events calendar, covering conferences, courses and exhibitions.

These changes bring *Information Technology* to the forefront of the revolution in informatics. The journal will, together with its sister publication *Information Age*, which covers information management, policy and social issues, provide access to the thoughts and theories of the leading professionals in the world of information technology, from researchers to policy makers.

# Social Science Information Studies

**Editor Dr. T. D. Wilson**

**Associate Editor Norman Roberts**

*University of Sheffield,  
Department of Information Studies,  
Sheffield S10 2TN, UK.*

**SSIS**

*Social Science Information Studies* links social scientists in many fields, including economics, politics, sociology, management, public administration, education and social psychology with practitioners, researchers, and teachers in information science. It publishes contributions on topics such as:

- information problems of the social sciences and applied social science, bibliometric studies, user studies, bibliographic data bases, networks, social science data-banks, national and international information policies.
- social science research methods and their application to information research, including survey research and its applications, evaluation research, causal analysis.
- inter-disciplinary research: research based in social psychology, sociology, management, economics, education, politics, and psychology which is concerned with topics allied to information science – innovations and the diffusion of knowledge, 'freedom of information', economics of information, and communication in organisations.

# information age

**data protection • availability • security • privacy**

## coverage

### regulation

- transnational dataflow
- national legislation
- conventions
- codes of practice

### economics

- commercial and financial issues
- information trade in goods and services

### social responsibility

- codes of ethics
- freedom of information
- civil liberties
- privacy

### information vendors

- information technology products
- information providers
- information media

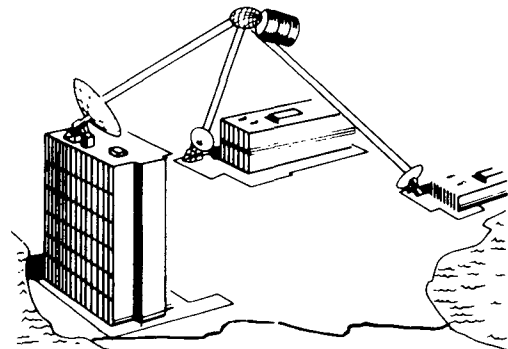

### implementation

- organizational issues
- guidelines
- information systems technology
- hardware, software and physical security
- computer misuse

### applications

- personnel records
- local government
- credit regulations
- medical records

**the quarterly international journal for all those concerned with the collection, storage and dissemination of information**
